

Bayesian Evidence Tree Report

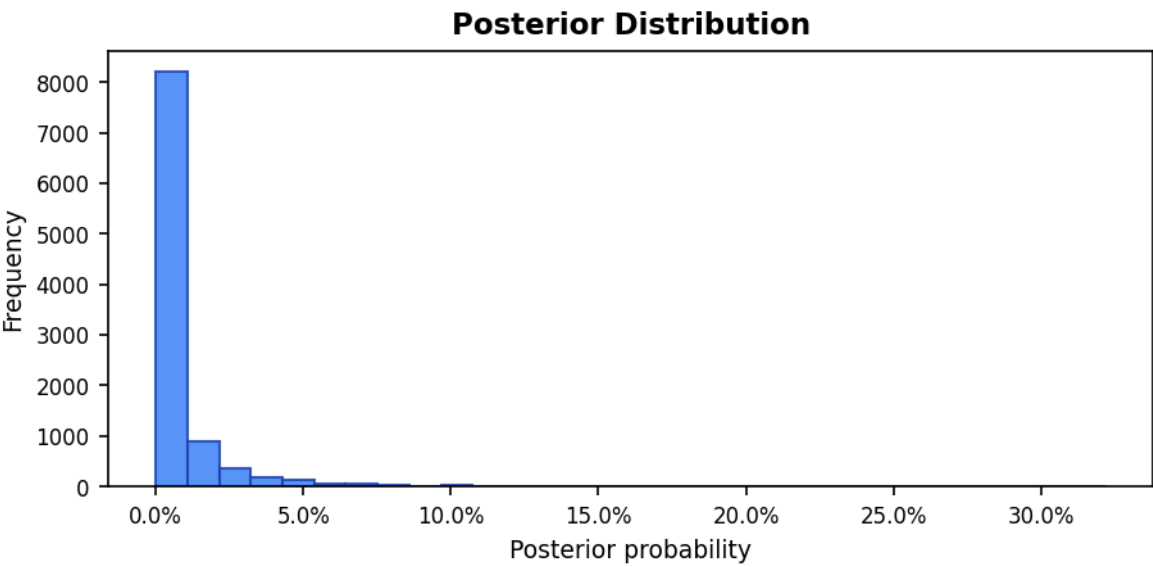

Does a theistic God exist?

Source: god.yaml
Simulations: 10,000
Generated: 2026-05-08 17:58

Summary Statistics

Metric	Value
Prior	50.0%
Posterior median	0.169%
Posterior mean	0.738%
Standard deviation	1.637%
90% CI	[0.008% – 3.390%]
Range	[0.001% – 32.195%]
Effective LR (median)	0.0017
Effective LR (90% CI)	[0.0001 – 0.0351]

Posterior Distribution

Sensitivity Analysis

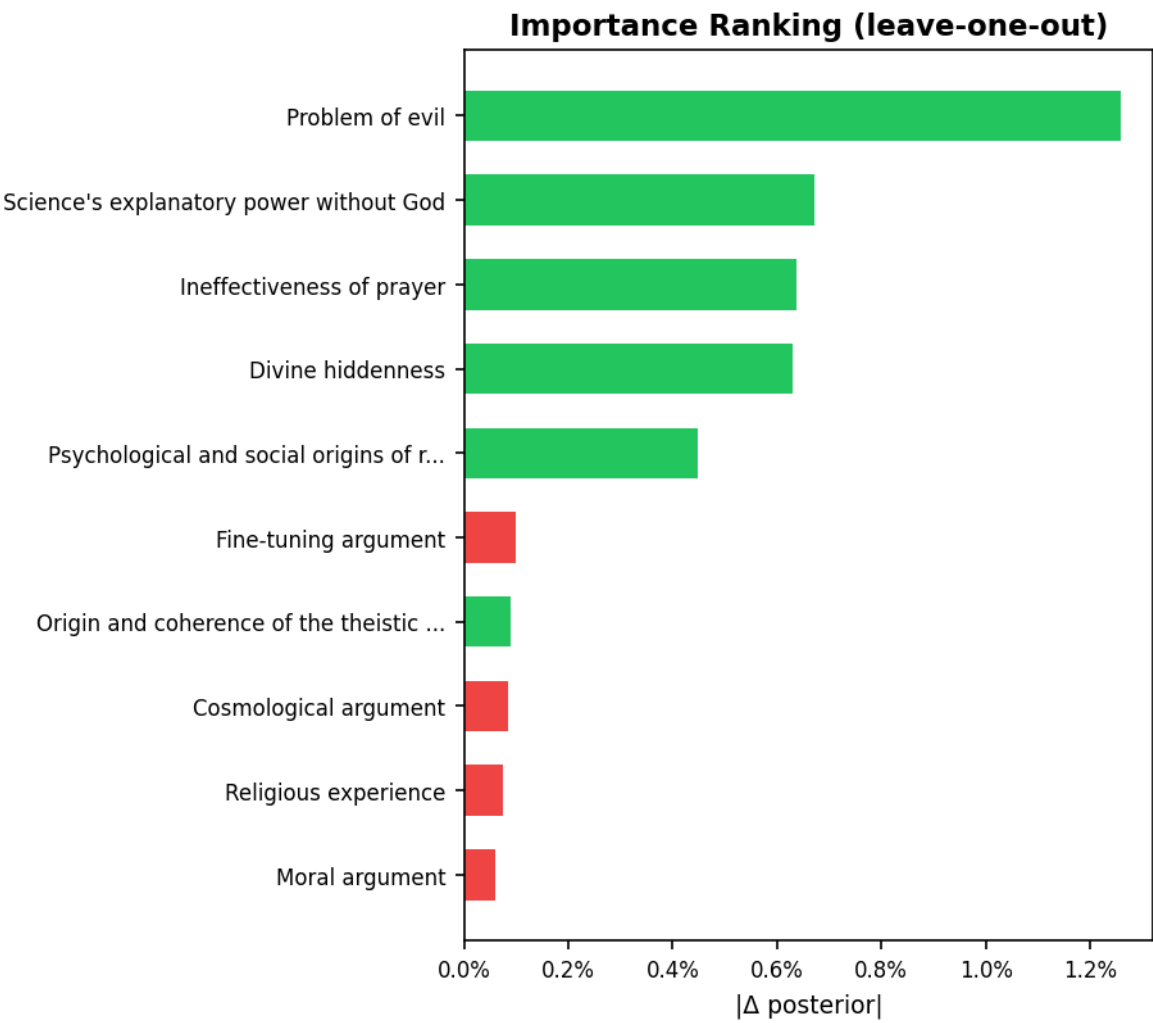

Threshold	Probability
P(posterior < 5%)	97.5%
P(posterior < 10%)	99.4%
P(posterior > 50%)	0.0%

Evidence Tree

Evidence Node	LR	Prior	Posterior	90% CI
Does a theistic God exist?		50.0%	0.166%	[0.007%–3.231%]
(+) Cosmological argument	[1.20–3.00]	50.00%	65.69%	[55.66%–74.16%]
(+) The universe has a beginning (Big Bang)	[1.10–2.00]	65.69%	73.81%	[68.48%–78.75%]
(+) A causal chain requires a first cause	[1.10–2.50]	65.69%	75.89%	[68.79%–82.07%]
(-) Quantum mechanics allows spontaneous genesis	[0.30–0.80]	65.69%	48.22%	[37.74%–59.42%]
(+) Fine-tuning argument	[1.50–4.00]	50.00%	70.75%	[61.19%–79.27%]
(+) Physical constants allow life	[1.50–4.00]	70.75%	85.55%	[79.15%–90.18%]
(-) Many-worlds theory explains without God	[0.20–0.60]	70.75%	45.34%	[33.81%–57.83%]
(-) Fine-tuning favors life but not purpose	[0.40–0.80]	70.75%	57.67%	[50.01%–65.08%]
(+) Religious experience	[1.20–2.50]	50.00%	63.34%	[55.35%–70.66%]
(+) A universal phenomenon across cultures	[1.20–2.00]	63.34%	72.89%	[68.03%–77.09%]
(-) Neuroscience explains experiences in the brain	[0.20–0.50]	63.34%	35.15%	[26.60%–45.14%]
(-) Experiences conflict across different religions	[0.30–0.70]	63.34%	44.02%	[34.97%–53.88%]
(+) Moral argument	[1.10–2.00]	50.00%	59.90%	[53.12%–66.02%]
(+) Universal moral intuitions	[1.10–1.80]	59.90%	67.74%	[62.82%–72.35%]
(-) Evolution explains morality without God	[0.20–0.60]	59.90%	33.82%	[23.98%–45.85%]
(-) Problem of evil	[0.05–0.25]	50.00%	10.23%	[5.18%–18.76%]
(-) Natural disasters and child suffering	[0.05–0.20]	10.23%	1.14%	[0.61%–2.08%]
(+) Theodicy: suffering allowed for free will	[1.20–2.50]	10.23%	16.54%	[12.42%–21.62%]
(-) Free will doesn't explain natural disasters	[0.20–0.50]	10.23%	3.46%	[2.33%–5.14%]
(-) Ineffectiveness of prayer	[0.10–0.40]	50.00%	16.42%	[9.60%–27.34%]
(-) Controlled studies do not support prayer effects	[0.10–0.35]	16.42%	3.59%	[2.06%–6.08%]
() God is not experimentally testable (preserving theism)	[0.80–1.50]	16.42%	17.63%	[13.93%–22.22%]
(-) Psychological and social origins of religion	[0.15–0.45]	50.00%	20.77%	[13.69%–29.84%]
(-) Belief correlates strongly with parents' religion	[0.15–0.40]	20.77%	6.03%	[3.99%–9.02%]
(-) Agent-detection (HADD) explains belief in gods	[0.20–0.50]	20.77%	7.63%	[5.21%–11.13%]
() Truth does not depend on origin of belief	[0.80–1.20]	20.77%	20.46%	[17.67%–23.56%]
(-) Science's explanatory power without God	[0.10–0.35]	50.00%	16.00%	[9.69%–24.81%]
(-) Evolution explains biological complexity	[0.10–0.30]	16.00%	3.25%	[1.97%–5.15%]
(-) Cosmology explains the origin of the universe	[0.15–0.40]	16.00%	4.52%	[2.93%–6.79%]
() Scientific gaps may still leave room for God	[0.80–1.50]	16.00%	17.09%	[13.53%–21.76%]
(-) Divine hiddenness	[0.10–0.40]	50.00%	16.33%	[9.58%–27.09%]
(-) A loving God would not leave sincere seekers without response	[0.10–0.35]	16.33%	3.45%	[2.04%–6.01%]
() Hiddenness is by design (Swinburne)	[0.80–2.00]	16.33%	19.74%	[13.98%–27.11%]
(-) Origin and coherence of the theistic God concept	[0.04–10.20]	50.00%	41.69%	[4.98%–88.49%]
(-) Definition comes from revealed literature	[0.05–0.20]	41.69%	6.59%	[3.70%–11.71%]
(-) Reliability of the Bible/Quran is itself in question	[0.05–0.25]	6.59%	0.79%	[0.38%–1.61%]
(-) Different religions' concepts of God conflict	[0.10–0.30]	6.59%	1.19%	[0.74%–1.98%]
(-) Historical texts reflect cultural context	[0.10–0.35]	6.59%	1.31%	[0.75%–2.26%]
() Logical coherence of the concept	[0.90–1.10]	41.69%	41.59%	[39.40%–43.80%]
(-) Omnipotent + omnibenevolent + evil presence in logical terms	[0.05–0.20]	41.59%	6.63%	[3.67%–11.73%]

Evidence Node	LR	Prior	Posterior	90% CI
(-) Omniscience + free will = paradox	[0.10–0.30]	41.59%	11.00%	[6.98%–16.89%]
() Philosophers have tried to solve these (plus etc.)	0.80–1.50	41.59%	43.88%	[36.96%–50.89%]
(-) Background probability for supernatural persons	0.05–0.20	41.69%	6.61%	[3.68%–11.82%]
(-) All known conscious agents are physical	[0.05–0.20]	6.61%	0.70%	[0.38%–1.30%]
(-) No mechanism for nonphysical mind to affect	0.05–0.25	6.61%	0.79%	[0.38%–1.61%]
() Philosophical possibility doesn't rule out physical	0.80–1.50	6.11%	7.23%	[5.54%–9.31%]

Importance Ranking (Leave-One-Out)

Rank	Evidence	Type	Δ Posterior	Without
1	Problem of evil	(-)	↑ 1.2582%	1.4272%
2	Science's explanatory power without God	(-)	↑ 0.6704%	0.8393%
3	Ineffectiveness of prayer	(-)	↑ 0.6375%	0.8064%
4	Divine hiddenness	(-)	↑ 0.6286%	0.7976%
5	Psychological and social origins of religion	(-)	↑ 0.4486%	0.6176%
6	Fine-tuning argument	(+)	↓ 0.0984%	0.0705%
7	Origin and coherence of the theistic God c...	(-)	↑ 0.0893%	0.2582%
8	Cosmological argument	(+)	↓ 0.0854%	0.0835%
9	Religious experience	(+)	↓ 0.0745%	0.0944%
10	Moral argument	(+)	↓ 0.0600%	0.1089%

Adversarial Robustness Audit

VULNERABLE — conclusion can be flipped by plausible attacks.

Baseline posterior: 0.16% | Attacks found: 3 | Most vulnerable: prior

#	Severity	Attack Description	Δ Posterior	Plaus.
1	HIGH	Prior shifted higher: 50% → 99%	+13.78%	4.0
2	LOW	Distribution for 'Origin and coherence of the theistic Go...	+1.68%	7.0
3	LOW	LR for 'Problem of evil' shrunk 25% toward neutral: [0.05...	+0.72%	5.5

Defense Recommendations

- [HIGH]** Prior shifted higher: 50% → 99%
- Justify the prior of 50% with reference to base rates, domain expertise, or a systematic literature review.
 - Include a prior sensitivity sweep (--prior-sweep) in your report to show readers the conclusion's robustness.
 - Consider whether a more informative prior (based on base rates) would strengthen the analysis.
